-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-72 are rejected under 35 U.S.C. 102(e) as being anticipated by Shafer.

Shafer shows a hydraulically actuated fuel injector having an injector control valve 12, and injector intensifier assembly 80 and a flow controller 51, annular flow passage 66, pressure relief valve 71, evacuation valve 58 and spring 56.

As to the limitations of the flow controller being a governor plate, Note that figure 3 shows the controller located in an element separate from the control valve position above the controller.

The device shown by Shafer will inherently perform the method steps as recited in the claims during normal operational use of the device.

### *Conclusion*

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nagarajan et al., Ausman et al. and Desai et al. all show devices in the general state of the art of the invention.
